Sequence 10, Application US/07890609C
Patent No. 600158
GENERAL INFORMATION:
APPLICANT: Tsui, Lap-Chee
APPLICANT: Rommins, Johanna M.
APPLICANT: Kerem, Bat-Sheva
TITLE OF INVENTION: Introns and Exons of the Cystic Fibrosis Gene and
TITLE OF INVENTION: Mutations at Various Positions of the Gene
FILE REFERENCE: 3477-61, 033477/139840
CURRENT APPLICATION UNWBER: US/07/890,609C
CURRENT APPLICATION UNWBER: US/07/890,609C
CURRENT FILING DATE: 1992-07-13
NUMBER OF SEQ ID NOS: 33
SOFTWARE: PatentIn Ver. 2.0
SEQ ID NO 10
LENGTH: 20
                                                                                                                                                                                                                    밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              밁
